

DeltaGraph 5.5 for Mac - Frequently Asked Questions

Q. What is DeltaGraph 5.5?

A. DeltaGraph 5.5 for Mac is a powerful data collection, analysis and presentation tool for the Macintosh operating system. It combines your data with customizable mathematical formulas and the ability to create stunning visual charts and graphs that increase your audience's ability to understand and digest the information you present.

Q. How does DeltaGraph meet the needs of researchers, analysts and managers?

A. By visually representing data, researchers, analysts and managers can quickly examine the information from multiple points, often identifying connections that could not otherwise be made. In addition, DeltaGraph provides hundreds of ways for you to represent complex sets data in charts and graphs that are meaningful and memorable for audiences.

Q. When will DeltaGraph be available and how do I purchase it?

A. DeltaGraph 5.5 is now available. Registered users of DeltaGraph 5.0 may download the free upgrade online at <http://www.redrocksw.com>. If you do not currently own DeltaGraph 5.0 and would like to purchase DeltaGraph 5.5 you may do so online at <http://www.redrocksw.com>.

Q. How much does DeltaGraph 5.5 cost?

A. DeltaGraph 5.5 for Mac is a free upgrade for registered users of DeltaGraph 5.0. If you do not currently own DeltaGraph 5.0 and would like to purchase DeltaGraph 5.5 you may do so online at www.redrocksw.com. DeltaGraph 5.5 costs US\$299 for a single user license and US\$199 to upgrade for qualifying DeltaGraph version 1.0 to 4.5 users. Academic and Multi-user licenses are also available. Please visit www.redrocksw.com for more information.

Q. Does DeltaGraph 5.5 work on Mac OS 9.x?

A. Yes! DeltaGraph 5.5 for Mac now operates on Mac OS 9.x. Please note that some features have been optimized to run on OS X and Panther, Mac OS v.10.3, only.

Q. How does DeltaGraph integrate with other data-centric software?

A. DeltaGraph can import ASCII files with multiple delimiters (tab, space, comma, pipe, etc.), WKS, SYLK and Excel 5.0 and earlier files. As almost every database program has the ability to export data as a delimited file, DeltaGraph can present graphs and charts based on data from almost any system.

Q. What are the system requirements for DeltaGraph 5.5?

A. DeltaGraph 5.5 requires the following system components:

Processor: Macintosh Power PC, G3 or later

Operating System: Mac OS 9.x or later

Memory: 128 MB of RAM

Drives: Internal hard drive with 60 MB of free space and Mac OS Extended (HFS+) format, the default format for Mac OS X
