

DeltaGraph 5 Now Available for the First Time to Mac OS X Users

Red Rock's DeltaGraph 5 Expands the Science and Art of Graphing to Take Advantage of Apple's Quartz Extreme Graphics and Aqua Interface

Salt Lake City, Utah (April 22, 2003) - Red Rock Software today announced the immediate availability of DeltaGraph™ 5, bringing the powerful, award-winning, graphing software to the Mac® OS X platform. This new version extends the charting, graphing, and data-analysis tools of DeltaGraph to take full advantage of the Macintosh® Quartz Extreme™ graphics system and Aqua™ interface.

Building on the benefits of the UNIX-based OS X operating system, DeltaGraph 5 enables Mac users to develop a broad spectrum of 2D and 3D graphs and charts containing the visual effects found in the Aqua interface. In addition, the software is optimized for the new Quartz Extreme graphics system, greatly improving the video and graphic performance of Apple computers.

"DeltaGraph 5 has taken the beautifully-innovative graphic capabilities that Mac OS X is known for and combined it with the science of data analysis," said Craig Hopson, CEO of Red Rock Software. "Using DeltaGraph, numbers, formulas and statistics are turned into compelling information that is engaging, enlightening, and easier to analyze."

The newest release of DeltaGraph contains over 80 chart and graph types with over 200 styles to address specific business needs. The software helps researchers, analysts, and managers who work with complex sets of data to collect, analyze and present their findings in a visually compelling and memorable manner. The flexible program includes a chart advisor and style libraries that enable users to quickly edit and arrange legends, grids, and pictures anywhere on a chart to achieve a greater level of impact and readability.

"The ability to rapidly communicate ideas and concepts is invaluable," said Patrick Arnott, a DeltaGraph 5 beta user from the Division of Atmospheric Sciences, Desert Research Institute. "With all the customizable charts in DeltaGraph 5, I'm able to share information with a wide audience."

In addition to charts and graphs, DeltaGraph's Formula Builder, with 50 statistical and other mathematical functions, helps users shorten the time it takes to analyze data from a variety of angles. DeltaGraph publishes results as paper reports, electronic presentations, or Web documents. This is the first time DeltaGraph has been available for Mac OS X users.

Pricing and Availability

DeltaGraph 5 for Mac OS X is available immediately at for an estimated street price of US\$299 for a single license. Qualified users of DeltaGraph versions 1.0 to 4.5 can upgrade to DeltaGraph 5 Mac for an estimated street price of US\$199. Please visit <http://www.vervante.com/deltagraph/> for more information. Academic and Multi-user licenses are also available by calling 801.322.4322.

About Red Rock Software

In addition to its DeltaGraph and TRAQtix business products, Red Rock Software (www.redrocksw.com) offers a comprehensive set of software design, engineering and management services. Red Rock has provided custom software solutions in science, medical, publishing, multimedia and office automation fields since 1994.

Based in Salt Lake City, Utah, Red Rock Software produces desktop, Web and enterprise-level applications for companies throughout the United States.
