

Red Rock Software Delivers DeltaGraph 5.6.1 for Mac; a Free, Maintenance Release for Current DeltaGraph 5 Customers

SALT LAKE CITY (June 14, 2005) – Red Rock Software announced the immediate availability of Red Rock DeltaGraph 5.6.1 for the Mac. The latest update to the company's award-winning data analysis, charting, and graphing software, fixes moderate defects found within both the Japanese and English versions of the product.

Red Rock Software has been working on known issues left over from the legacy code provided by SPSS since the company first took over the maintenance of the code in 2002. The problems addressed by this release range from misaligned and misplaced text to OS and printer interoperability issues.

The free maintenance release is recommended for all users of DeltaGraph 5.x for Mac and is available for Mac OS 9.x and Mac OS X 10.1.5 or later. For a complete list of the issues corrected by this release, please visit Red Rock Software's website at www.redrocksw.com.

About Red Rock Software

Headquartered in Salt Lake City, Utah, Red Rock Software (www.redrocksw.com) is the developer of Red Rock DeltaGraph 5.x for both Mac and Windows.
