

## Red Rock Software Wins “Macworld Best of Show Award” and Releases DeltaGraph 5.02

### Red Rock DeltaGraph 5.02 Upgrade Expands Compatibility to Include Mac OS 9

**SALT LAKE CITY, Utah, (July 28, 2003)** - Red Rock Software today announced the immediate availability of its latest update to DeltaGraph™ 5, version 5.02, just after the graphing, charting and data analysis program for the Mac® OS X platform received the Macworld magazine and Web sites, “Macworld Best of Show Award” at Macworld CreativePro Conference & Expo™ in New York.

“Macworld Best of Show Awards” are highly regarded as merits of distinction within the Macintosh industry. The awards are presented to products that represent, according to Mac Publishing LLC, “the most exciting hardware and software products at the Macworld CreativePro Conference & Expo.” Red Rock DeltaGraph 5 was one of only twelve hardware and software products recognized by this award.

On the heels of winning this award, Red Rock Software announced that their latest update, Red Rock DeltaGraph 5.02, is now available. This free upgrade extends compatibility to the Mac OS 9 platform, adds the ability to now import data directly from Microsoft® Excel v.X and enables network site licensing.

“We are delighted to have Red Rock DeltaGraph 5 recognized by the editors of Macworld magazine and Web sites and have our dedication to the product reinforced,” said Craig Hopson, CEO of Red Rock Software. “And now, with the release of DeltaGraph 5.02, we are pleased to offer more functionality to meet the demands of all our customers - whether they use Mac OS X or Mac OS 9.”

Red Rock DeltaGraph 5.02 helps researchers, analysts, and managers who work with complex sets of data to collect, analyze and present their findings in a visually compelling and memorable manner. The software enables Mac users to develop a broad spectrum of 2D and 3D graphs and charts. Red Rock DeltaGraph 5.02 contains over 80 chart and graph types with over 200 styles to address specific business needs.
