

iScratch™ Quick Start Guide

System Requirements

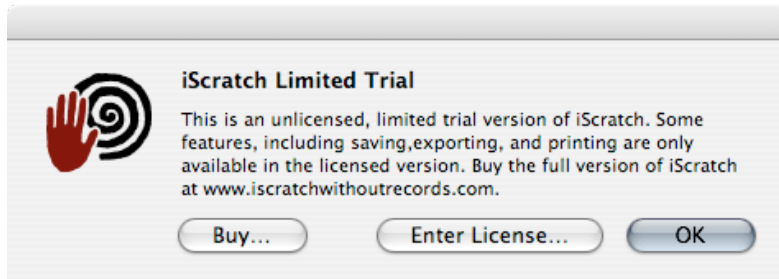

Processor: Power PC G4 800 MHz (1 GHz or better recommended)
Any Intel
Operating System: Mac OS X 10.4 or later
20 MB of disk space for application and sample files
Internet access for product activation

Installation

To install iScratch double click the "iScratch Installer.pkg" file and follow the instructions. The installer will put the iScratch folder in your "Applications" folder by default but you can change the install location. To uninstall simply drag the iScratch folder to the Trash.

Trial Mode

iScratch will run in Trial Mode until it has been activated. When running in Trial Mode iScratch limits the total number of notations that can be added to a document; saving, exporting and printing are also disabled. If iScratch has not been activated, the following dialog will be shown every time iScratch is launched.

Clicking the "Buy..." button will take you to the iScratch page in the Red Rock Software online store where you can purchase iScratch.

Clicking the "Enter License..." button will open a dialog where you can activate iScratch.

Clicking the "OK" button will allow you to use iScratch in Trial Mode.

Purchase

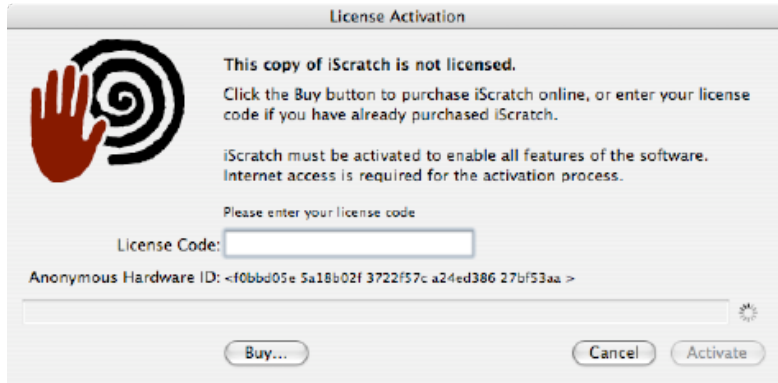

To purchase iScratch go to www.iScratchWithoutRecords.com and click on the "Purchase" link at the top of the page. You can also launch iScratch and click the "Buy..." button in Trial dialog (as shown above).

Activation

Activation is required before all of the features of iScratch are fully functional. During activation iScratch communicates with the Red Rock Software Activation Server and thus an active connection to the Internet is required. Each iScratch License Code may only be used for activation

on a single computer.

If iScratch is running select "License..." from the iScratch menu, if iScratch is not running launch iScratch and click the "Enter License..." button in Trial dialog (as shown above). This will open the License Activation dialog as shown below.

If you have not yet purchased iScratch click on the "Buy..." button.

If you do not wish to complete the activation process click the "Cancel" button and iScratch will continue to run in Trial Mode.

To activate iScratch you will need a valid License Code, this will be sent to you in an email after you have purchased iScratch from the Red Rock Software online store. Copy/paste it from the email message (or type it in) to the "License Code:" text field. Note that the "Activate" button will not be enabled until a valid code has been entered. Once the "Activate" button has been enabled click it and iScratch will communicate with Red Rock Software Activation Server and activate iScratch. Please be patient, this may take several seconds to complete. Once iScratch has been activated it will be fully functional and all features will be enabled.

Please note that no personal information is sent during the activation process. An "Anonymous Hardware ID" is created and sent to the activation server but it is simply a unique identifier and contains no information about you or your computer.

Registration

Stay up to date with the latest iScratch software. Register your copy of iScratch at www.iScratchWithoutRecords.com and enjoy full Technical Support and notification of software updates.
